# Today's Speaker

---

**Mr. James Doe**

**Associate Director of REaKTOR Innovation Center**

# REaKTOR Acronym

---

- R:** In organic chemistry, R is an abbreviation for any group in which a carbon or hydrogen atom is attached to the rest of the molecule and is sometimes used more loosely to include other elements. We like to think of this aspect as REaKTOR, the 'support group'.
- Ea:** In chemistry, Ea represents the energy which must be available to a chemical system with potential reactants to result in a reaction. This is the activation energy we hope to bring out in the budding entrepreneurs of our program.
- K:** In physics, K is the energy an object possesses due to its motion and is defined as the work needed to accelerate a body of a given mass from rest to its stated velocity. With the resources REaKTOR offers, cohorts and clients are constantly mentored throughout every stage of development to maintain the path to success.
- TORR:** TORR is a standard unit of pressure equal to 1/760 mm of Hg. We understand the TOR pressures and obstacles in starting a new business. Our goal is to help overcome entrepreneurial challenges and break down barriers.
